

Exchange Pro | VIS8

Skype™ on All of Your Office Phones

VoSKY simplifies the deployment of Skype for the business environment with its turn-key VoSKY Exchange Pro VIS8 PBX-to-Skype gateway to enable businesses of all sizes to enhance communications and reduce telecom costs via Skype, the world's largest VoIP network. The VoSKY Exchange Pro VIS8 is a stand alone, rack-mountable FXS PBX gateway that does not require a PC. This plug & play appliance seamlessly integrates with any existing TDM or IP PBX through the analog trunk ports to add up to 8 lines to Skype. Multiple Exchange Pro gateways in different office locations can be interconnected together to enable free calls between colleagues. Calls to other Skype users are free, while calls to non-Skype users are charged at low-cost SkypeOut rates

Supports Full Skype Experience

Skype is the biggest and most popular VoIP network in the world, boasting over 200 million users worldwide. Tapping into this huge resource used to require a costly and time-consuming overhaul of your existing PBX phone system. The VIS8, however, with its rack-mountable, single box installation, allows you to access Skype without having to “forklift” your entire phone system. And, after installation, anyone in the office can grab a Skype line just by picking up a normal phone (no more headsets!) and dialing a preset number. VIS8 automatically finds an open Skype line, and you're making free or low-cost calls.

Leverage the Power of Skype with Four Business-class VoIP Applications

- 1 Multi-Site PBX Networking** – Companies with offices in different locations can eliminate the cost of intra-office communications by installing a VIS8 in every office. This creates a virtual PBX that replaces costly point-to-point leased lines with Skype-to-Skype trunking system that enables free calls and creates a common office phone system.
- 2 Remote PBX Access** – More savings can be realized using VIS8 by offering office road warriors, telecommuters, or satellite office workers remote access to the corporate PBX via Skype. These remote users can call back to headquarters using Skype's softphone on their laptop.
- 3 Website Click-to-Call** – VIS8 also features the ability for a business to equip its website with a "Click-to-Call" function that allows customers and partners to click a button on the website and place a free Skype call to the sales, customer service, or technical support departments.
- 4 Skype Trunking** – With VIS8 connected to the company PBX, employees can make low-cost SkypeOut calls to any traditional long-distance or international landline or mobile number from their office desk phones. Savings of up to 90% of standard phone rates can be realized by taking advantage of SkypeOut.

Exchange Pro VIS8

Ideal for SMBs... Connect, Communicate and Collaborate on the World's Largest FREE VoIP Network

The VIS8 is perfect for SMBs (small- and medium-sized businesses) that are searching for better and more efficient collaboration and communication techniques, especially if they operate in a multi-office, multi-location environments. The ability to leverage Skype's massive networking reach, combined with ease-of-use, and free or low-cost calls, makes the VIS8 a perfect addition to a company's communications arsenal.

Other Advantages

Additionally, the VIS8, with its built-in server, gives your IT department better control of the network and its appliances. Also, you can depend that your communications will be secure with Skype's end-to-end Skype encryption. Finally, VIS8 checks for new firmware revisions every 24 hours, ensuring that it is always up to date.

About Skype

Skype is the world's largest free VoIP supplier, with over 200 million users. Skype aims to delight you by offering free global telephony to make unlimited, superior quality voice calls via its next-generation peer-to-peer software. Skype is a wholly-owned subsidiary of eBay.
